

Patient Name: Noah Ark

Date of Visit: Oct 10, 2025

Physician: Dr. Debra Smith, MD

Clinic: Trinity Family Health, Dallas, TX

Claim Number: 12345678

Visit Summary:

The patient presented for a routine checkup. Blood pressure remains stable on current medication. Reports occasional use of albuterol inhaler prior and post intense exercise sessions for mild, exercise-induced wheezing. No shortness of breath, cough, or chest tightness reported when at rest.

Physical Exam & Vitals

BP: 124/80 mmHg

HR: 72 bpm

Respiratory: Lungs clear to auscultation, no wheezes

Cardiac: Normal rate and rhythm, no murmurs

Assessment & Plan

1. Continue current management for hypertension
 2. Continue albuterol inhaler as needed before and after strenuous activity
 3. Encourage regular aerobic exercise and hydration
 4. Follow up in 6 months or sooner if symptoms worsen
